Hibiscus Restaurant

Our delightful Hibiscus Restaurant is an open-sided pavilion where guests can enjoy a relaxing ambience while being serenaded by the gentle sound of the waves only a few metres away. The menu offers superb European, Indonesian and Oriental cuisine, including a wide range of salads, soups, sandwiches, vegetarian dishes, imported steaks, fresh fish, and divine desserts.

Beach Terrace

Meanwhile, you couldn't ask for a more magical setting for a unique dining experience than the adjoining Beach Terrace. Savour a romantic candlelit experience as you dine under the stars, and catch the gentle sea breezes beside the Indian Ocean. From here you can see Nusa Penida during the day, and the glimmering lights of the 'jukung' traditional fishing boats at night.

Bougainvillea Bar

The adjacent Bougainvillea Bar is a cosy place to enjoy a wide choice of local and imported spirits, beer, wine and innovative tropical cocktails, together with some hot and cold snacks.

Swimming Pools

Two enticing swimming pools, each with an adjoining kids' pool, provide the perfect setting to laze and relax. Our infinity pool is dramatically located immediately in front of the beach in our coconut grove garden. The crystalline waters blend seamlessly with the azure sea, so that when you are in the pool you will have the impression that you are swimming in the ocean. The pool experience also includes the indulgence of a bubbling whirlpool, in addition to a swim-up bar where you can enjoy cool tropical cocktails.

Sports Facilities

If you are feeling energetic, you will enjoy our Private Beach Tennis Court, Billiard Table, Table-Tennis, Volley Ball and Basket Ball facilities. Candi Beach Cottage also boasts a jogging track where you can jog in the peaceful and idyllic surroundings of our natural

Traditional Massage Service

Imagine surrendering your body and mind to the ultimate massage experience in a dreamy pavilion alongside the clear turquoise waters and golden shoreline of the Indian Ocean. Here, to the rhythmic murmur of the waves, you can relish a traditional Indonesian massage, which combines stretching, acupressure and an evenly applied palm pressure. Using a blend of aromatic oils, our highly skilled masseuse will rhythmically propel their fingertips, knuckles, and the heels of their hands in long and short strokes over your body, including your face and scalp. Searching for knots of tension, they will work deep into your muscles to relieve stress, improve your blood circulation and balance your body. Stress will cause the muscles to tense up and the blood vessels to constrict. Massage will alleviate this, relaxing the muscles, releasing the tension, freeing the blood vessels, and stimulating circulation. Good blood circulation is essential for good health and clear thinking, allowing both the brain and body to function better.
